1 SECTOR OVERVIEW
The consumer goods sector is one of Myanmar’s fastest-growing business areas, due to the country’s strong economy, increasing purchasing power, and relatively young population compared with neighbouring countries of China, Thailand, India, Lao PDR and Bangladesh. Myanmar’s proximity to these countries places it within reach of almost 40% of the world’s population\(^1\), underlining its potential to become a regional trading hub.

The transition to a civilian government in 2011 and the accession to power of the NLD party in 2015 saw the easing of sanctions and introduction of economic reform that have, in turn, spurred dramatic economic growth. After being declared the World’s Fastest Growing Economy by the IMF in the 2016 World Economic Outlook, Myanmar’s economy decelerated in 2016–2017 due to rising tensions in Rakhine state and a contraction of the agricultural sector in light of recent flooding. 2016 GDP reached US$ 67.4 billion, but fell short of World Bank and IMF projections of 7-8% growth, slowing to 5.9% as investors await clarity on the government’s economic policies and response to the widely-publicized conflict in Rakhine\(^2\). Regardless, the World Bank projects that growth will resume at about 7% per annum each year until 2020\(^3\).

![Figure 1: GDP Growth by Sector](image)

The fruits of economic growth remain largely concentrated in the urban areas of Yangon and Mandalay. Only 34% of Myanmar’s 51 million people are urban-dwellers\(^4\), and the disparity in wealth is pronounced. While national per capita GDP hovers just over 1200 USD, one of the lowest in the region, per capita income in Yangon is estimated at anywhere between 1700–3000 USD, while incomes levels in conflict-affected states can be as low as a quarter of that\(^5\).
Foreign Direct Investment has remained strong at just under 7 billion USD, despite a 30% decrease from 2016 attributed to a decrease in the number Chinese projects and hesitation by investors. China and Singapore combined account for over 50% of all FDI commitments. Outside of oil & gas and power, manufacturing and communications were key foreign investment sectors. Foreign investment in local manufacturing for international brands combined with domestic investment in real estate (especially retail space), has spurred the consumer goods sector. According to Oxford Business Group, from 2012 to the end of 2014, Myanmar’s retail sector expanded by 7–15% per year, in line with overall GDP growth in excess of 7% over the same period.

**Figure 3: Total FDI by Sector**

**Figure 4: Foreign and Domestic Investment by Sector**

1.1 CURRENT MARKET SITUATION

Myanmar’s fast-moving consumer goods (FMCG) sector grew by 15% from 2010–2014, according to Nielsen Emerging Markets Research. The retail industry is currently valued at between US$ 10–12 billion, or roughly 15% of GDP, with strong growth projections in the short and medium terms. vi There are approximately 250,000 retail outlets in the country, with grocery, convenience, fabric, pharmacy, and fashion accounting for 45% of total retail stores, according to City Mart Holding Limitedvii.

Unlike other commercial sectors, Myanmar’s retail market is broadly characterised as a domestically-dominated market with mostly local tenants. However, future modern retail developments bode well for foreign brands, especially mid-tier priced items in the popular clothing, accessories and apparel lines, as well as fast-moving consumer goods.

In addition, many major consumer goods companies have plans for significant expansion over the next few years. Inside Retail Asia reports that a survey of over 200 executives found that 70% of domestic businesses and 80% of international companies in the country have expansion plans in the coming yearviii. The scope of expansion plans is well-illustrated by the increasing number and popularity of convenience stores. Until recently, Myanmar boasted only 1 convenience store per 250,000 people, which is 30–40 times lower than rates found in more mature markets of neighboring Thailand, Malaysia and Singapore. In response, City Mart has announced it will double the number of its supermarkets and treble the number of its convenience stores, while ABC plans to increase the number of its convenience stores from 100 to over 900 in the next five yearsix.

Yangon’s retail market has undergone rapid change with construction of a number of modern shopping developments to keep pace with robust demand. 2017 saw the addition of over 50,000 sq. m (538196 sq ft) of retail space, a 47% increase from 2016, driven by the addition of a number of new malls like the St. John City Mall and Junction City Shopping Mall. Despite the rapid growth, occupancy rates remain at 95%. Rents have likewise grown by 14% year-on-year to 31 USD per sq. m, but are expected to stabilize as more supply enters the market. Colliers forecasts that an additional 70,000 sq. meters of leasable space will become available over the next two years, driven by life-style malls and mixed-use developments as the young urbanized population of Yangon shifts preferences away from traditional trade channels to more modern and aspirational onesx.

1.2 CONSUMER DEMOGRAPHICS

In a representative consumer survey conducted by Deloitte in early 2016, 62% of consumers surveyed in Yangon and Mandalay indicated they felt optimistic about the current economy, with 54% stating that they intend to increase their household expenditures next yearvi. Of those intending to increase their expenditures, 98% expect to increase by 10% or more. Consumers in lower income brackets expressed more optimism than those in the wealthiest households, pointing to their steadily
increasing ability to purchase goods and services beyond their most basic requirements.

About two-thirds of the population earns between US$ 125 – US$ 500 each month. The typical Myanmar consumer allocates between 46% – 49% % of their monthly household spending to cover food and other groceries, household products, and personal care products. As more products enter the market and consumers have more options, “taste” and “quality” have joined “price” as the most important product attributes. Consumers still have a preference for local brands, especially outside of Yangon where foreign brands may be largely unfamiliar, but increasingly prefer foreign brands for non-essential and luxury items such as beauty products and appliances.

Despite rapid expansion of Modern Trade channels like supermarkets and branded showrooms in urban areas, Traditional Trade venues such a roadside vendors and local grocery stores are still the most frequented. Consumers across all income brackets believe that products from traditional channels are fresher, as inventory is smaller and regularly re-stocked, and cheaper.

2 INVESTMENT OPPORTUNITIES
When considering potential investment opportunities, it is critical that foreign companies analyse the strengths and weaknesses of local competition, as well as the demographics and preferences of the consumers they serve.

2.1 STRENGTHS AND WEAKNESSES OF LOCAL COMPANIES

**Strengths**

The strengths of Myanmar consumer goods companies lie in:

- Ability to understand local market needs, such as cultural issues impacting their chase decision making;
- Having an established distribution network and sales-force;
- Boasting established brand names (serving as competition on new foreign brand entrants).

Having existed in the market long before the sector was open to foreign investors, local companies have a first mover advantage of serving the market and having established their brand name in the minds of Myanmar consumers.

Even with consumer preferences for familiar brands that cater to their tastes, WPP estimates that 32% of brands in Myanmar are “blank slate” in that they are new enough that consumers are either not yet aware of them or have not yet formed an opinion of them, whereas only 16% of brands globally are “clean slates”\(^{xiii}\). This indicates there is significant opportunity to capture first-mover advantage in the sector.

**Weaknesses**

Despite having first mover advantage and relatively large market share, local companies are also constrained by a number of factors.

One of the major weaknesses of local companies is the lack of financial capital to expand. This includes limitations on the development and launch of new products, the extension of current product lines, diversification into new consumer goods products, plus marketing and branding activities, etc. Moreover, their appetite for business risk is relatively low, while corporate governance, structure, and management are at times not up to international standards, especially among small-to-mid size consumer goods companies.

A common weakness of local consumer goods companies is the lack of advanced technologies or technical capacity in manufacturing. This has an impact on the effectiveness and efficiency of manufacturing processes as well as diversification issues.

Local companies are also weak in research and development initiatives, with restricted budgets for new product development and innovation. The failure to embrace a philosophy that emphasises the importance of market research brace
a philosophy that emphasises the importance of market research, product testing, and focus group discussions is a common characteristic of local companies.

**Areas of Investment for Foreign Investors**

There are many areas of investment for potential foreign investors in Myanmar in the consumer goods and retail sector. The following section highlights some of the major investments made by international investors over the last few years, as a way of illustrating the types of consumer goods which have seen market growth.

**2.2 RECENT FOREIGN INVESTMENTS**

Gaining momentum from the political and economic liberalization reforms, as well as the introduction of policies that encourage international investment and promote trade, the consumer goods sector has recently enjoyed a number of major foreign investments, ranging from alcoholic beverages to automobiles and supermarkets.
• Japan's Kirin Holding bought a 55% stake in Myanmar Brewery for USD 560 million, to launch locally-brewed Kirin Ichiban beer.
• Japan's Mitsubishi Corporation and Myanmar's Capital Diamond Star Group (CDSG) formed a food manufacturing and distribution JV, with Mitsubishi investing over USD 200 million for the next three years.
• December 2015. US private equity firm TPG Capital bought a 50% stake in Myanmar Distillery Company, a manufacturer of alcoholic beverages in Myanmar.

February 2016.

• February 2016. Nissan announced it will invest USD 50 million to begin assembly of the Sunny compact sedan in Myanmar its partner, Tan Chong Motor Group. Nissan plans to transfer production to a new plant in the Bago region, which will employ about 300 people and have an annual output capacity of 10,000 cars.
• April 2016. Hitachi Home Electronics Asia (S) Pte. Ltd. announced that it has established Hitachi Home Electronics Myanmar Co., Ltd., to grow its market share in the home consumer business segment.
• April 2016. The government has approved an investment by Japan's Yakult Honsha Co. Ltd. for the manufacturing and wholesale of fermented milk drinks.
• May 2016. Shwe Taung Group announced it will diversify its operations into the food and beverage sub-sector by partnering with Singapore, Breadtalk Group.
• August 2016. Aeon Co Ltd partnered with Creation Myanmar Group of Companies Limited (CMGC) to create Aeon Orange Co. Ltd. to acquire 14 supermarkets by CMGC through its affiliate, Hypermarket Asia Co. Ltd.
• August 2016. Fujifilm announced a USD 6 million investment to establish a facility in Thilawa Special Economic Zone to expand sales of its products and services in Myanmar.
• November 2016. Taiwan's SheenHo International Creation Group awarded a master franchise to a local company, Creation Strength Co Ltd, to invest about MMK 1.3 billion and open up to 20 branches over five years.
• December 2016. Singapore-listed Myanmar Investco Limited, a diversified business group, has committed to operate retail space at the new terminal of Yangon International Airport.

February 2017.

• February 2017. Singapore-listed Yoma Strategic Holdings Ltd. joined with Germany's Metro Group, an international wholesale and food retail company, to establish an integrated wholesale distribution platform.

3 GOVERNMENT RULES AND REGULATIONS ON FOREIGN INVESTMENTS
3.1 GENERAL LEGAL/INVESTMENT STRUCTURE INFORMATION

The new Myanmar Investment Law (MIL) was signed in October 2016 and has been effective since April 1, 2017; the MIL combines the Foreign Investment Law (FIL) 2012 and the Citizens Investment Law 2013. The new investment law was created to attract both foreign and local investors by simplifying the application process and offering tax breaks, incentives, rights and protections for businesses.

The key points of MIL are:

<table>
<thead>
<tr>

</table>
Key Change | Description
--- | ---
Long-term Land Lease possible beyond MIC Permit | Foreign investors may lease land for their business for up to 50 years (+ 10 years + 10 years with approval from MIC) with private landlords or government entities.

Compensation for Expropriation | Expropriation of investments is allowed under the following conditions:

(a) necessary for the public interest;
(b) carried out in a non-discriminatory manner;
(c) carried out in accordance due to process of law;
(d) on payment of prompt, fair and adequate compensation.

Grievance Mechanism | MIC will establish and manage a grievance mechanism to inquire and resolve issues before escalation to legal disputes, and to prevent the occurrence of disputes.

Under the MIL, a foreign investor is allowed to conduct business in Myanmar as a:

- 100% foreign-owned entity in permitted sectors;
- Joint venture with foreign, local, or government entities.

### 3.2 MYANMAR INVESTMENT COMMISSION (MIC)

Investors must submit a proposal to the MIC only if the investments are:

- Activities essential to the national strategy;
- Large capital-intensive investment projects;
- Likely to cause a large impact on the environment and local community;
- Use state-owned land and buildings;
- Designated by the government as necessary to submit the proposal the committee.
3.3 UPCOMING LAWS

3.3.1 Myanmar Companies Act

A new piece of legislation called the Myanmar Companies Act was approved by President U Htin Kyaw on December 6, 2017 and will tentatively enter effect in August 2018. The new Act will replace an older version of the Act drafted in 1914. The act will improve corporate governance by allowing:

- More flexible capital structures and changes to capital share
- Ability for foreign investors to purchase shares in the Yangon Stock Exchange
- Eliminate the requirement for foreign firms to obtain a permit to trade from DICA
- Possibility to incorporate a one-person company with a unique director

Importantly, foreign investors will be able to hold up to 35% of ownership interest in a Myanmar company; if foreign stakes constitute more than 35%, the company is considered a foreign company. This will enable foreign investors to invest in companies in sectors that are currently closed to foreign investors (such as industrial equipment and pharmaceuticals), and thereby indirectly help to create foreign interest in companies listed on the Yangon Stock Exchange.

3.3.2 Consumer Protection Law

The government is presently amending the Consumer Protection Law 2014 to improve consumer protection. The amended law will include more defined charges and sentences for offending business owners and clearer steps for engaging in dispute resolutions.

3.4 CONSUMER GOODS-RELATED RULES AND REGULATIONS

The MIC published Notification 15/2017 in April 2017 which distinguishes business activities based on the permitted types of ownership. It also lists the prohibited and restricted activities for foreign investment. This Notification repealed the earlier Notification 26 / 2016. Business activities that are not listed in the MIC notification can be carried out with 100% foreign investment.

3.4.1 Activities Prohibited to Foreign Investors

Activities prohibited for foreign investors are primarily related to sectors impacting national security or use of natural resources. The only consumer goods activity prohibited for foreign investors is:

- Mini-market, convenience store (floor area must be below 10,000 square feet or 929 square meter), Industrial Code CPC62
### 3.4.2 Activities Permitted only via Foreign-Domestic Joint Venture

The following consumer good business activities can be permitted in the form of a joint venture with a Myanmar citizen or government.

<table>

*Table 3: Activities Permitted for Joint Ventures*
Prohibited Activities

The following activities are prohibited from foreign ownership.

- Activities related to the electric distribution network such as power system control and power trading
- Manufacturing of arms and ammunition and related services Foreign retail chains are not allowed at the moment.
Myanmar’s current economic outlook remains positive, despite the downturn in 2016, as the country continues to implement economic reforms. Drawing up on its young workforce, strategic location, and increasing foreign investment, Myanmar is expected to see yearly GDP growth at 7% per annum, rising to USD 200 billion by 2030\(^v\). In addition, Myanmar will join the AEC in 2018, which is expected to bring many benefits to the country’s economy.

### 4.1 CHALLENGES

Despite strong growth potential, investors in Myanmar still face a number of challenges, which can be broadly categorized as:

**Infrastructure**

- The supply of electricity is limited and unreliable. Only 32% of homes have mains electric lighting, while businesses cite power outages as a major constraint to performance. Large manufacturing companies suffer on average 15 outages each month and draw 10—15% of their electrical supply from generators\(^{vi}\).
- Myanmar’s poor logistics network, with its dilapidated nationwide transport infrastructure, poses an obstacle for foreign investors in the movement of goods. As such, nationwide distribution coverage is not common for most consumer goods brands. Third-party logistics providers with extensive country-wide distribution networks are also limited.
- There is also an absence of a cold storage supply chain network for perishable and frozen food. It is challenging, time consuming and expensive to distribute in remote areas, particularly the hilly regions. Moreover, distribution efficiencies are also affected by unreliable internet and mobile phone connectivity necessary for GPS (Global Positioning System) and fleet management systems.

**Demographic**

- Despite the high proportion of youth, there is a limited pool of skilled employees in Myanmar. This makes the recruitment and retention of high quality local staff difficult and expensive given the high demand from competitors across sectors.
- Local consumers tend to have strong brand loyalty and a substantial amount of time and marketing is required to influence them to switch from established brands. Local consumption habits continue to favour local products, though this is largely due to availability.
- Consumers still prefer cash payments. Even though increasing numbers of urban residents have a bank account and/or bank card, 99% still conduct transactions in cash. Successful companies will have to accommodate this phenomenon.
4.2 OUTLOOK

Robust economic growth, increasing purchasing power and urbanization, and the consumerisation of digital communications have all contributed towards bringing Myanmar’s emerging middle class greater exposure to international brands. As such, Myanmar presents a significant investment opportunity for consumer goods companies across a range of areas.

Rising incomes will fuel the expansion of the country’s consumer class, growing to 10 million people, or 15% of the population, by 2020 alone\textsuperscript{xviii}. Likewise, consumer spending is projected to triple over the next decade. Within this context, the consumer goods sector will benefit from the evolving buying preferences of the young and aspirational urban middle-class, who are looking to spend their increasing incomes on international brands which have an established international reputation.
5 INDUSTRY CONTACT INFORMATION
5.1 GOVERNMENT OFFICES

Ministry of Commerce

The Ministry of Commerce is responsible for the trading of consumer goods, as trade activities can only be conducted with licenses from the Ministry. Trading licenses are issued both in Nay Pyi Taw and Yangon.

MAILING ADDRESS
Director General
Department of Trade
Ministry of Commerce
Building No. 3, Office Compound, Nay Pyi Taw

TRUSTED SERVICE PARTNERS

Luther.

Luther is a full service law firm with more than 350 lawyers and tax advisors in 18 offices in Europe and Asia, including Belgium, China, Germany, Great Britain, India, Luxembourg, Malaysia, Myanmar and Singapore.

Active in Myanmar since 2013, with a current staff strength of more than 45, Luther is one of the largest law firms and corporate services providers in Yangon. Our lawyers, tax advisors and corporate secretaries cover the whole range of corporate and commercial legal work as well as the structuring of investments into Myanmar. Accounting, payroll, tax-compliance and administrative support are provided by our internationally trained accountants and tax consultants.

Pun Hlaing Estate is a beautifully landscaped oasis of luxury estate homes and spacious apartments located by the Hlaing and Pan Hlaing rivers and built around one of Myanmar’s most prestigious golf courses. Contemporary and elegantly designed with large panoramic windows to afford an excellent view of the lush landscaping and greenery, a home in Pun Hlaing Estate is a breath of fresh air away from the city.

Prefer a high-rise residence? StarCity, located in Thanlyin Township, is ideal for your sky-high aspirations. Planned to anticipate every need, the amenities, facilities and retail spaces form a community within a community, the first of its kind in Myanmar. Its prime location ensures convenient access and a short commute for professionals – a 25-minute drive from downtown Yangon, and only ten minutes to Thanlyin Town.
