This publication has been produced with the assistance of the European Union. The contents of this publication are the sole responsibility of EuroCham Myanmar and can in no way be taken to reflect the views of the European Union.
EuroCham serves as the voice of European business in Myanmar. Its main mission is to significantly increase the presence of European companies in the country and to facilitate market access particularly for European SMEs – by advocating for member interests with the government and organisations in Myanmar, the ASEAN region and the EU.

With a strong, growing network of partners, EuroCham offers on-the-ground assistance for European businesses interested in commercial endeavours in Myanmar, whether in the form of advocacy, business services, research or networking.

This sector guide provides entry-level information for European companies planning to enter this fascinating frontier market. Please contact us for further information and support.

1 SECTOR OVERVIEW
With a population of over 53 million people, Myanmar’s underdeveloped healthcare sector represents an area of considerable opportunity.

According to the World Health Organization (WHO), Myanmar’s healthcare expenditure relative to GDP is one of the lowest in the world. In 2016, the figure rested at just over 1% of the country’s USD 64.37 billion GDP, significantly below the 5% the WHO recommends for all countries. Relative to other ASEAN member states, Myanmar’s healthcare system is poor, and life expectancy at birth is one of the lowest among the ASEAN countries at 68.2 years.

In recent years, the military-backed civilian government and the new administration have both prioritised the healthcare sector with increased budget allocations, promotion of healthcare-related investments, and the release of the National Healthcare Plan (2017–2021) in December 2016, which describes plans to achieve universal health coverage by 2030.

The current government has indicated that one of its first priorities will be improving and expanding basic healthcare provision, reducing out-of-pocket payment (OPP) spending on medical treatment (over 93% of health care spending in 2012), and permitting the opening of more private healthcare centres to reduce the strain on public hospitals.

1.1 CURRENT MARKET SITUATION/UPDATES

Myanmar’s healthcare sector is serviced by both the private and public sectors. The Ministry of Health & Sports (MOHS) is responsible for implementing the National Comprehensive Development Plan (NCDP), and the Department of Health – a department of the Ministry of Health & Sports – serves as the main regulatory body for healthcare providers as well as stakeholders in the fields of pharmaceuticals, medical devices and capital investment.

The Myanmar Medical Association (MMA) is the facilitator between different healthcare providers, ensuring that private practitioners are integrated into public healthcare activities. Several supporting government agencies are also authorized for registering and licensing doctors, dentists, nurses, midwives and traditional medical practitioners.

- MDOMC (Myanmar Dental and Oral Medical Council);
- MNWC (Myanmar Nurse and Midwife Council);
- TMC (Traditional Medical Council);
- MFDBA[FDA] (Myanmar Food and Drug Board of Authority).

1.1.1 Increased Government Spending

Since 2011, the government has been gradually increasing public budget allocation for both the healthcare and education sectors. Government health expenditure increased from USD 279 million in 2012-2013 to USD 789 million in 2017-2018, but this still represents just over 1% of Myanmar GDP. These funds are earmarked
for activities such as: the purchase of advanced medical equipment, including electro-surgical technology; the provision of free medical treatment for government employees; and the training of medical professionals.

**Government Expenditure on Healthcare (2012-2018), USD Millions**

*Note: No data available for the Philippines*

*Note: USD values converted from Myanmar Kyat at exchange rate as of November 27th, 2017 (Source: XE.com)*
1.1.2 Healthcare Manpower

Currently, Myanmar has fewer doctors per capita than many countries in the region. According to the WHO, in 2015, there were 6.1 doctors per 10,000 people compared with 11.9 in Vietnam, 19.5 in Singapore, and 12 in Malaysia.

1.1.3 Universal Healthcare Coverage

The Ministry of Health & Sports plans to implement the Universal Health Coverage program nationwide by 2030\textsuperscript{x}. There are three components of Universal Healthcare Coverage (UHC):

- Population coverage
- Service delivery
- Financial protection

The government’s priorities are first to improve access to healthcare via a more efficient referral system, especially for primary care at township levels; and second, to build an essential medicine program, ensuring generic-quality medicines are available at all levels of the public healthcare system. The successful implementation of the program faces numerous challenges, including: shortage of medical staff, lack of proper medical equipment, weak healthcare infrastructure, and insufficient government funding.

1.1.4 Health Insurance Scheme

A new health insurance scheme was introduced in mid-2015 but take-up has been low with fewer than 2,000 applications after 6 months of operation\textsuperscript{x}. Until 2013, the state-owned Myanmar Insurance held a monopoly on the insurance industry and did not offer health coverage. There are now 12 private insurers, of which 9 offer health insurance\textsuperscript{x}. These 9 private insurers offer health insurance to individuals between the ages of 6 and 65 at a rate of MMK 50,000 (USD 45) per unit (see table below). The policies offer up to five units with each unit entitling the policy holder up to MMK 15,000 (USD 13.5) a day in hospital charges for up to 30 days. According to the insurance policies, a person can only buy up to five units.
The amounts that can be claimed for different types of units are described as follows:

<table>
<thead>
<tr>
<th></th>
<th>1 UNIT</th>
<th>2 UNITS</th>
<th>3 UNITS</th>
<th>4 UNITS</th>
<th>5 UNITS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1-year premium price</strong></td>

<td>5,000,000 kyats</td>
</tr>
</tbody>
</table>

Table 1: Health Insurance Policy Prices

The payment and application process for insurance was designed by the Insurance Business Regulatory Board and is the same for all 12 insurers, excluding Myanmar Insurance. Insurance providers are required to pay out MMK 1,000,000 (USD 900) in cases of accidental death.

### 1.1.5 Healthcare Financing

According to the WHO, Myanmar has the highest out-of-pocket-payment (OPP) rates of healthcare spending in ASEAN - 92.7% as of 2012\(^\text{xii}\). Although more recent OPP data is not yet available, the situation is believed to have improved slightly, with public hospitals providing a proportion of treatment free-of-charge. Public hospitals provide healthcare subsidies, which have made them very popular; at the same time, this has led to overcrowding in the hospitals, with many patients unable to stay in hospital rooms. The middle and upper classes tend to choose private hospitals for better services.

### 1.1.6 Influx of FDI

Ambitious government plans for the healthcare sector, coupled with the general opening up of Myanmar to foreign companies, has led to an inflow of foreign direct investment (FDI). Multinational companies like General Electric (GE)\(^\text{xiii}\), as well as regional companies across ASEAN, have invested in Myanmar’s healthcare sector, especially in provision of medical equipment, and hospital operation. Notable examples include Malaysia-based hospital operator KPJ Healthcare, Singapore-based AsiaMedic Ltd, as well as the Thai private hospital group Bangkok Dusit Medical Services Pcl.
1.2 CHALLENGES

Aside from lack of adequate healthcare labour, weak infrastructure and limited finance, Myanmar’s healthcare sector also struggles with a weak domestic capacity to produce pharmaceuticals. Pharmaceuticals are smuggled across the Chinese, Thai and Indian borders, which impact the domestic pharmaceutical market\textsuperscript{v}. The quality of these drugs is often questionable, resulting in serious health effects for the users, who are often poor and/or from rural areas. This challenge is further compounded by the fact that Myanmar’s Food and Drug Administration is understaffed, lacks basic equipment, and has limited access to laboratory and cold storage facilities, which all have an impact on its ability to keep new drugs for testing and approval before release.

1.3 HEALTHCARE SECTOR STATISTICS

The following table shows some general indicators of the country’s healthcare sector:

Outside of city hospitals, health centres are often limited to providing basic services. Most of these centres are in rural areas. They typically suffer from a shortage of doctors, and are often headed by poorly-trained health supervisors who can only perform basic treatments. These centres also lack adequate medical devices and equipment, and often refer patients to nearby hospitals for more advanced treatment.
1.4 GOVERNMENT INITIATIVES

To achieve the government’s “Health for All Goal”, a series of National Health Plans targeted at improving primary health care services have been systematically developed and implemented. In particular, a long-term health development plan, the ‘Myanmar Health Vision 2030′xvi (from 2000/2001 to 2030/2031), has been drawn up to address future health challenges by prioritising the following areas:

- Health policy and law
- Health promotion
- Health service provision
- Development of human resources for health
- Promotion of traditional medicine
- Development of health research
- Role of co-operatives, joint ventures, the private sector and NGOs
- Partnership for health system development
- International collaboration
- Role of co-operatives, joint ventures, the private sector and NGOs

Tender closing date: 4 October 2016

The Department of Medical Services, Yangon Region, under the Ministry of Health & Sports, has invited an open tender to purchase the following items in Myanmar Kyats.

<table>
<thead>
<tr>
<th>NO</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Central Medical Stores Depot for the supply of Cancer Drugs</td>
</tr>
</tbody>
</table>

2.2 POTENTIAL OPPORTUNITIES FOR FOREIGN COMPANIES

The healthcare sector provides numerous opportunities for foreign companies. Before entering the market, it is important to analyse the competence of the existing competition: the local companies. The strengths and weaknesses of local companies are listed below.

**Strengths**

Major hospitals in cities such as Yangon and Mandalay already have a large pool of middle-class consumers. Yet, as the consumer class grows, they will look for more sophisticated healthcare services. The recent relaxation of laws governing foreign investment in healthcare, coupled with current lack of high-quality government healthcare facilities, may provide opportunities for foreign healthcare providers. However, European firms will face competition from established entities within Myanmar and from other ASEAN member states.

Compared with international companies, local healthcare providers tend to have a better understanding of local culture, and are often perceived by Myanmar citizens as better at providing bedside manners and understanding of patient requirements.

**Weaknesses**

Most of Myanmar’s private and public hospitals run at full capacity to meet client demand, especially in cities such as Yangon and Mandalay. The limited number of healthcare professionals and the large number of patients mean that, at times, the level of service and care provided is below international standards. Private hospitals tend to perform better than public hospitals in this respect. However, even in these institutions, disputes occur and there have been several cases of medical negligence. In addition, the number of doctors, specialists, nurses and dentists is limited, with
just 6.1 doctors per 10,000 people. New entrants may find that acquiring skilled, local medical professionals is challenging. There is also a limited number of specialist medical service providers, such as psychiatrist clinics and dermatologists.

Due to financial constraints, public hospitals (other than those in Yangon and Mandalay) are not equipped with modern healthcare devices and equipment. Although the government is increasing spending to address this issue, it is a major challenge and will require a significant amount of time to resolve.

Domestic production of pharmaceuticals and medical devices is limited. Although there are a few companies who produce pharmaceuticals – such as Burma Pharmaceuticals Industry (BPI) and FAME Pharmaceuticals – doctors often only assign prescriptions for foreign medicines. In terms of medical devices and equipment, foreign brands still dominate the market.

<table>
<thead>
<tr>
<th>NO</th>
<th>INVESTMENT AREA</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Healthcare equipment</td>
<td>Myanmar’s healthcare sector lacks modern medical equipment and devices, which were previously unavailable due to economic sanctions. With the easing of sanctions, many foreign companies have entered Myanmar to provide medical devices and equipment to both the private and public sectors. However, hospitals in many parts of the country remain in need. Some hospitals use out-dated devices and equipment while some lack them entirely.</td>
</tr>
<tr>
<td>2</td>
<td>Healthcare &amp; Pharmaceutical Supplies</td>
<td>High demand with very small domestic production create an opportunity for foreign pharmaceutical companies. However, the pharmaceutical industry is dominated by illegal imports. Although the FDA has attempted to tackle this issue, no effective measures have been implemented yet.</td>
</tr>
</tbody>
</table>
No foreign investor has entered the healthcare services sector yet, which presents an opportunity to provide services of an international standard for the first time in Myanmar. The need for improved healthcare services is not just limited to hospitals and clinics, but also includes diagnostic centres and laboratories.

The future of Myanmar’s healthcare relies heavily on the quality and service of healthcare professionals in the region. Understanding the importance of this, the government has been collaborating with companies like GE in launching training programs to produce healthcare service professionals who are well versed in up-to-date medical practices and technology.

Due to the lack of international quality healthcare services currently available in Myanmar, many affluent Myanmar citizens and foreign expatriates prefer to fly to neighbouring countries, such as Thailand, Malaysia, India and Singapore, to receive medical treatment. Thailand is the preferred choice due to its proximity, similar culture, low costs, and the fact that it offers visa exemption to Myanmar nationals.

Many Myanmar citizens are interested in foreign healthcare treatments; however, lack of information on foreign companies and concern over language barriers limit their ability to access these foreign treatments. To attract this customer group, many foreign hospitals have now established subsidiary offices in Myanmar.

Some foreign-partnered hospitals in Myanmar, mostly from Thailand, are as follows:

<table>
<thead>
<tr>
<th>Hospital Name</th>
<th>Country</th>

3 GOVERNMENT RULES AND REGULATIONS ON FOREIGN INVESTMENTS
### GENERAL LEGAL/INVESTMENT STRUCTURE

The new Myanmar Investment Law (MIL) was signed in October 2016 and has been effective since April 1, 2017; the MIL combines the Foreign Investment Law (FIL) 2012 and the Citizens Investment Law 2013. The new investment law was created to attract both foreign and local investors by simplifying the application process and offering tax breaks, incentives, rights and protections for businesses.

The key points of MIL are:

<table>
<thead>
<tr>
<th>Key Change</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Ease of Foreign Investment</strong></td>
<td>Foreign Investors are permitted to own 100% of businesses which are not on restricted or prohibited lists.</td>
</tr>
<tr>
<td><strong>Investment Screening</strong></td>
<td>An investor may submit an investment screening application to the Myanmar Investment Commission (MIC) for non-bidding guidance on whether a proposal investment:</td>
</tr>
<tr>
<td></td>
<td>• Requires an MIC Permit application;</td>
</tr>
<tr>
<td></td>
<td>• Requires Pyidaungsu Hluttaw (Union Parliament) approval prior to Permit issuance;</td>
</tr>
<tr>
<td></td>
<td>• Is prohibited or restricted under the MIL and related notifications;</td>
</tr>
<tr>
<td></td>
<td>• In a Promoted Sector under the MIL and related notifications.</td>
</tr>
<tr>
<td><strong>Devolvement of Authority for Endorsement Application</strong></td>
<td>Application with investments less than USD 5 million in non-strategic and non-restricted sectors will be handled at the State / Regional level, with close involvement of the State / Regional DICA officials.</td>
</tr>
<tr>
<td><strong>Removal of Blanket Incentives</strong></td>
<td>Business may be granted tax exemptions if investments are in promoted sectors – the duration of tax exemption is contingent upon the areas in which business set up operations.</td>
</tr>
<tr>
<td></td>
<td>• Less developed regions (Zone 1) granted 7 years of tax exemption;</td>
</tr>
<tr>
<td></td>
<td>• Moderately developed regions (Zone 2) granted 5 years of tax exemption;</td>
</tr>
<tr>
<td></td>
<td>• Adequately developed regions (Zone 3) granted 3 years of tax exemption.</td>
</tr>
</tbody>
</table>
Key Change | Description
--- | ---
Long-term Land Lease possible beyond MIC Permit | Foreign investors may lease land for their business for up to 50 years (+10 years +10 years with approval from MIC) with private landlords or government entities.
Compensation for Expropriation | Expropriation of investments is allowed under the following conditions:
(a) necessary for the public interest;
(b) carried out in a non-discriminatory manner;
(c) carried out in accordance due to process of law;
(d) on payment of prompt, fair and adequate compensation.
Grievance Mechanism | MIC will establish and manage a grievance mechanism to inquire and resolve issues before escalation to legal disputes, and to prevent the occurrence of disputes.

Under the MIL, a foreign investor is allowed to conduct business in Myanmar as a:

• 100% foreign-owned entity in permitted sectors;
• Joint venture with foreign, local, or government entities.

### 3.1 MYANMAR INVESTMENT COMMISSION (MIC)

Investors must submit a proposal to the MIC only if the investments are:

• Activities essential to the national strategy
• Large capital-intensive investment projects
• Likely to cause a large impact on the environment and local community
• Use state-owned land and buildings
• Designated by the government as necessary to submit the proposal the committee
3.2 UPCOMING LAWS

A new piece of legislation called the Myanmar Companies Act was submitted to the upper house of Parliament in July 2017 and will replace an older version of the Act drafted in 1914. The act will improve corporate governance by allowing:

- More flexible capital structures and changes to capital share
- Foreign investors will be able to purchase shares in the Yangon Stock Exchange
- Eliminate the requirement for foreign firms to obtain a permit to trade from DICA
- Possibility to incorporate a one-person company with a unique director

Foreign investors will be able to obtain ownership interest up to a threshold of 35% in a Myanmar company before the company is considered a foreign company. Importantly, foreign investors will be able to hold up to 35% of ownership interest in a Myanmar company; if foreign stakes constitute more than 35%, the company is considered a foreign company. This will enable foreign investors to invest in companies in sectors that are currently closed to foreign investors (such as industrial equipment and pharmaceuticals), and thereby indirectly help to create foreign interest in companies listed on the Yangon Stock Exchange.

3.3 HEALTHCARE-RELATED RULES AND REGULATIONS

3.3.1 Healthcare-Related Laws

3.3.2 Activities Permitted for 100% Foreign Ownership

MIC Notification No. 15 /2017 sets out the business activities based on their permitted forms of ownership, and further relaxed laws relating to healthcare investment. Economic activities which are not included in the notification can be carried out with 100% foreign investment, although many of these activities require the approval of the relevant ministry.
3.3.3 Activities Not Permitted by Foreigners

<table>
<thead>
<tr>
<th>Sector</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Healthcare</td>
<td>Establishment of quarantine station for exportation and importation of animals (Livestock Breeding and Veterinary Department shall undertake to inspect animals and to issue)</td>
</tr>
<tr>

#### 3.3.6 Activities Promoted by Myanmar

MIC Notification 13/2017 lists several promoted sectors. Investors in these sectors may benefit from tax discounts including exemption from corporate income tax, customs duties and the right to deduct depreciation / expenses from assessable income. Sectors relevant to healthcare include:

- Production of medicine, chemical products for medicine and botanical products
- Production of chemical items
- Production of traditional medicine
- Production of medical equipment and supply
- Hospital service
- Medical laboratory service
- Traditional hospital service
- Private clinic service
- Manufacturing of Veterinary Medicine
- Science research and development projects for agriculture and breeding
- Research for medical education and medicine
- Research for Industrial development, engineering and technology
- Research on traditional medicine and laboratory service
4 CHALLENGES AND OUTLOOK
The government’s ambition to introduce UHC creates a positive atmosphere for European investors. Nevertheless, lack of finance, underqualified staff, and limited capacity to meet consumer needs could hinder the successful implementation of UHC. To counter this challenge, the government has received substantial international aid in the form of grants and loans, but further support will be needed.

4.1 CHALLENGES

With 66% of the population residing in rural areas (according to 2017 World Bank Indicators)xxii, rolling out UHC will take a significant amount of time.

The low level of domestic production of pharmaceuticals and medical devices presents an opportunity for foreign investors. On the other hand, challenges such, as illegal, low quality pharmaceutical imports, pose a threat. Effective measures by the government to tackle these illegal imports would increase the attractiveness of the market.

The government is actively encouraging foreign investment. Recent notifications have removed many of the foreign ownership restrictions that previously prevented foreign investment.

So far, rising disposable income, a growing middle class and opportunities to target a market that currently relies on overseas medical care are all factors that have enticed foreign companies to Myanmar. According to Nielsen, healthcare expenditure constituted 9% of the typical Myanmar consumer’s monthly household expenses in 2014 – it was the second largest category of consumer spending, behind only food & groceries. Although this may seem low compared to other regional benchmarks, rising incomes driven by strong economic growth are expected to increase spending power on healthcare.

4.2 OUTLOOK

Despite several challenges in the sector, the outlook for healthcare provision in Myanmar is positive. The government’s ambition towards implementing UHC, the relaxation of laws related to healthcare investment, expected increases in consumer spending power, along with the positive changes to the insurance industry, are all factors that create opportunity for foreign investors in providing healthcare services and products.
5 INDUSTRY CONTACT INFORMATION
5.1 GOVERNMENT OFFICES

The Ministry of Health & Sports is the focal Ministry for the healthcare sector.

Ministry of Health & Sports

MAILING ADDRESS 4 Zeya Htani Rd, Nay Pyi Taw
CONTACT +95 67 411 298

Ministry of Planning and Finance

DICA and MIC are the lead government bodies for foreign business incorporation in Myanmar. Both fall under the authority of the Ministry of Planning and Finance. Companies need to be aware of procedural updates issued by the MIC in order to successfully navigate the legal aspect of investment.
5.2 OTHER RELEVANT ASSOCIATIONS

Myanmar Medical Council (MMC)

Myanmar Medical Council (MMC) is responsible for the recognition of medical degrees offered by local and foreign medical institutions. MMC compiles, keeps and sometimes publishes lists of registered medical practitioners and licensed medical practitioners.
Myanmar Pharmaceuticals and Medical Equipment Entrepreneur Association (MPMEEA)

Myanmar Pharmaceuticals and Medical Equipment Entrepreneur Association (MPMEEA) is the association of all entrepreneurs who are actively involved with pharmaceuticals, medical instruments, hospital equipment, and health-care consultancy. They are the manufacturers, traders, exporters, importers, wholesalers, retailers etc. in the healthcare business fields. Importing pharmaceutical and medical equipment requires price recommendations from the MPMEEA.
